Rock Drills

The APT Model 109 and Model 115 are lightweight tools used for drilling holes for anchor bolts and small dowel hole drilling. These versatile tools have a stop rotation feature that converts them from a drilling tool to a percussion tool for light chipping in horizontal and overhead work. The Model 137 and Model 155 are used in general construction, utility work, and plant maintenance. They are designed for drilling through granite, hard faced rock, quarry drilling and drilling secondary holes for blasting. They are also used with dowel hole drilling machines. Adaptable to wet drilling application by attaching APT valve, wet tube and swivel assembly.

Model 109 - 9 lb. class

- left-to-right hand rotation
- stop-rotation feature
- light-weight aluminum cast handle
- available with spline chuck

Model 115 - 15 lb. class

- stop-rotation feature
- built-in automatic oiler
- latch type retainer
- light-weight aluminum cast handle
